

EMPOWER Your Surveillance

Videofied® enhances sophisticated surveillance systems, acting as "remote sentries" that can be located anywhere, providing instant video alerts of intrusions. Site managers or guard staff can use the power of their megapixel pan/tilt/zoom cameras and surveillance system to coordinate incident response.

Videofied System

MotionViewer™ Outdoor Camera

Optional Outdoor Siren

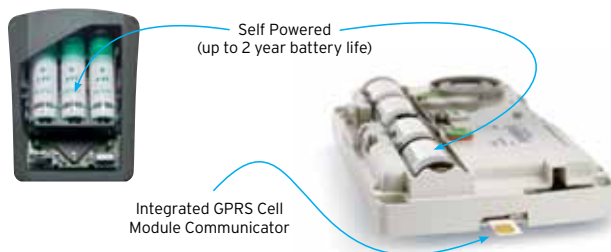

Keypad

Control Panel

- No AC Power
- 2 year Battery Life
- Weatherproof (-20F to +140F)
- Totally Wireless Operation
- Instant Installation, Portable
- Video Alarm sent over Cell Network to Monitoring Station
- Eliminate False Alarm Fines

Video Security Unplugged

- Entire system operates outdoors on batteries for up to 2 years
- Up to 24 cameras on a single system
- Night illumination out to 40 ft.
- Wireless RF range between Cameras and Panel up to 2,000 feet
- Motion Sensing up to 40 feet
- Instant wireless installation anywhere

Your Instant EYEWITNESS™

VIDEO SECURITY UNPLUGGED

AFFORDABLE PORTABLE ANYWHERE

www.alphaintegrated.ca

Instead of Recordings of Yesterday's Crimes.

Motion activates the integrated night vision camera and sends a 10 second video of what tripped the sensor to the monitoring station and on to the site manager or property owner. Based on this instant eyewitness, operators dispatch police to a verified "crime in progress" instead of a standard alarm. Instant notification and priority response means apprehensions and greater security.

The Instant Eyewitness means fast response to catch intruders. In contrast, property owners use traditional CCTV systems and DVRs to review what happened after an incident occurs and identify the intruder. More often than not, identification is impossible because of poor lighting and intruders wearing masks or hoods.

Portable Remote Sentries The portable battery powered MotionViewer (PIR motion sensor with integrated camera and illuminators) can be installed anywhere; often mounted on portable stands that can be picked up and moved around as the situation demands- no trenching, no wires. The integrated PIR motion sensor detects intruders in storms and blizzards, ignoring the rain or snow.
